

# MEG-A-THERM COBRA

## "THE LIQUID SNAKE" DRAIN OPENER and MAINTAINER

TECHNICAL DATA

### GENERAL DESCRIPTION

Meg-A-Therm COBRA is a powerful, professional drain solvent designed to dissolve all organic obstructions on contact.

### AREAS OF APPLICATION

In commercial kitchens, apartment complexes, industrial plants, hotels and motels, schools, food processing plants, etc.

### SPECIAL FEATURES

**Opens Clogged Drains Fast** - Goes to work immediately to dissolve common organic stoppages such as grease, sanitary napkins, coffee grounds, soap, paper, cloths, lint, cigarette butts and petroleum greases. Foreign material not dissolved are released once the organic "binders" are dissolved by Meg-A-Therm COBRA.

**Restores Shrinking Drain Pipe Diameter** - Drain pipes build grease deposits, soap films, soft scale, slime and lose their efficiency. Drain pipes can become slow or actually stop. Regular applications of Meg-A-Therm COBRA removes these deposits and eliminates the shrinkage in traps, cross pipes, elbows and other areas near the drain openings.

**Will Not Harm Pipes** - Unique solvent action works only on organic matter. Will not deteriorate copper, steel, PVC pipes and fittings or rubber hardware within the system. Will not affect septic tank operation. Meg-A-Therm COBRA is neutralized when mixed with large volumes of drain water.

**Flashback is Eliminated** - Gradual, controlled activation of solvents reduce the risk of dangerous explosive reaction or flashback.

**Concentrated Power** - Meg-A-Therm COBRA's ingredients weigh twice as much as water and this weight carries the product to the source of stoppage with little loss of effectiveness.

### USE DIRECTIONS

1. Remove excess water from sink, drain or toilet.
2. Slowly pour 4-8 oz. (120-240 mL) Meg-A-Therm COBRA directly into drain.
3. **SINK DRAINS:** Let stand for 10 minutes. Flush with large quantity of water. Repeat if necessary.  
**FLOOR DRAINS:** Use about 8 oz. (240 mL) of contents and follow directions as above.
4. **PREVENTATIVE MAINTENANCE:** Use about 3 oz. (90 mL) regularly to prevent future blockages.

Remove excess water from sink, drain or toilet before use. Do not pour into standing water. Do not use on aluminum or galvanized material. Use with adequate ventilation.

**NOTE:** Where drain fails to open due to blockage by glass, plastic, iron or other inorganic material, use great caution when inserting mechanical cleaning devices. Meg-A-Therm COBRA remains active until it has been thoroughly diluted with large quantities of water. Rinse off equipment thoroughly with water after opening drain.

**DANGER: POISON. KEEP OUT OF REACH OF CHILDREN.** Contains sulphuric acid. Causes severe burns. Avoid contact with skin, eyes or clothing. Wash hands or any other area thoroughly if exposed to the concentrated liquid or diluted product.

**WARNING: DO NOT MIX THIS PRODUCT WITH ANY OTHER CHEMICAL.**

**DO NOT USE WHEN ANY OTHER CHEMICAL IS PRESENT.**

### PHYSICAL PROPERTIES - LIQUID

Meg-A-Therm COBRA consists of specially purified sulphuric acid and penetrants.

Type .....	Drain Opener/Maintainer
Appearance .....	Amber Liquid
Odour .....	Slightly Acidic
Viscosity .....	Slightly Viscous
Flammability .....	Non-Flammable
pH (concentrate) .....	<1
Specific Gravity .....	1.8 - 1.85
Solubility in Water .....	100%
Biodegradable .....	Yes
Toxicity (concentrate).....	Serious Severe Eye/Skin/Inhalation/Ingestion Burns

### APPROVALS/CERTIFICATIONS

Canadian Food Inspection Agency

**FOR USE IN INDUSTRIAL, INSTITUTIONAL, MARINE, COMMERCIAL and FOOD PROCESSING ENVIRONMENTS**

### PACKAGING

Case (12 x 1L Bottles)  
Case (12 x 454mL Bottles)

DM1909
